EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gerhard W. Thielman (Reg. No. 43,186) on July 28, 2005.

The application has been amended as follows:

Please cancel claim 36.

Allowable Subject Matter

2. Claims 1-29 and 31-35 are allowed and re-numbered as 1-34.
3. Claims 30 and 36 have been cancelled.
4. The following is an examiner's statement of reasons for allowance:

The reasons for allowance for claim 33 are disclosed in an Office Action mailed on November 16, 2004 and the reasons are not repeated herein, but are incorporated by reference.

The instant invention defines a method and a recording medium for determining a location of a peak of a correlation function generated by comparing a first high-spatial-frequency image to a second high-spatial-frequency image, the correlation function having a regular background portion and a peak portion as disclosed in independent claims 1 and 35. The claimed invention distinguishes over the prior art by the manner in which the distributed correlation function value is determined based on comparing the first high frequency image to the second high frequency image at a plurality of offset positions to determine a plurality of corresponding distributed correlation function values. The claimed combination allows for improving a method of determining a location of a peak of a correlation function.

This method is conventional in the art. However, the prior art of record fails to teach identifying at least one correlation function value point that lies within the peak portion based on comparing at least one value characterizing the regular background portion of the correlation function to at least one of a) at least one correlation function value of the set of distributed correlation function value points and b) a determined value based on at least two of the correlation function value points. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims 2-32 are allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shefali D. Patel whose telephone number is 571-272-7396. The examiner can normally be reached on M-F 8:00am - 5:00pm (First Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Mancuso can be reached on (571) 272-7695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
